Prices track the rebound

- Improving macro indicators, recovering trade and industrial activity on the global scale have characterized the outgoing month, where commodity benchmarks reflect the same return path to recovery indicated by the TRJ index climbing 6.6%MoM.

- While demand remains below pre-COVID levels and stifling of growth resulting from specific restrictions on movement and sub-par public health outcomes (accelerating COVID cases in India, Brazil and parts of USA) constrain consumer sentiments, all major commodity classes in our analysis have treaded higher on MoM basis (with the exception of -0.4%MoM move in Gold).

- In terms of energy commodities, Crude benchmarks (Brent/Arab Light up 3.7/10.0% MoM) and Coal (average prices up 2.4%MoM) as lower price levels made shale production unfeasible reducing active rigs further and effective supply curbs tightened demand-supply dynamics.

- Urea (up 20%MoM), Cotton (up 0.5%MoM) and Steel (rebar/billets price rose 1.3%/2.1% MoM) during Aug’20 benefitted from lower supply while individual restrictions on import of commodities amidst an environment of rising protectionism has also distorted pricing dynamics over the medium term.

- With major global economies suffering from historic contraction in growth and job losses, Pakistan remains relatively shielded from the negative repercussions of COVID-19 outbreak. Despite this cushion, inflation remains volatile, with food prices the usual culprit. Additionally remittances and constrained import bill lend some support on the external front.

MoM% (X Axis) and CYTD (Y axis) Commodity price movement snapshot

Oil inches higher as supply dynamics wilt: Crude prices reflect a continued rebound (Brent/Arab Light prices up 3.7/10.0%MoM), while remaining below levels witnessed last year (Brent/Arab Light prices down -25/-25%YoY). Major supply demand dynamics dictating crude price movements include: 1) depleting rig counts in North America as low price levels make production through shale unfeasible and 2) growing discontent amongst OPEC+ members where consensus amongst producers faces hurdles in the form of prolonged dampness in global demand. The number of active oil rigs has been broadly stable for the last seven weeks, after plunging almost 75% between mid-March and mid-July. Even so, the rig count is likely to start moving higher as the rise in oil prices since April starts to filter through into business decisions resulting in reallocation of capital to feasible production. Additionally, members of the Organization of the Petroleum Exporting Countries (OPEC) and their partners in the broader exporters’ alliance (OPEC+) are showing signs of weakening resolve to output cuts agreed in April. OPEC+ consensus faces...
headwinds in the form of over-production by several countries for idiosyncratic reasons, the need for “compensating” output cuts in future, and requests for “exemptions”. At the same time, consumption is not recovering as fast as anticipated three months ago, as the coronavirus epidemic continues and major economies are hit by job losses.

**Low economic activity keeps coal prices range bound:** Coal prices have remained range bound for the last two months with prices averaging US$54.6/55.3/ton for Jun’20/Aug’20 as global economy continues to grapple with COVID-19 related restrictions while currently Richards bay prices are trading around US$55.6/ton, up 2.4% against Aug’20 average. The two major demand centers saw a decline in demand with China largely abstaining from coal imports to support local coal prices while India’s imports also declined by 34.9% during Aug’20 to 12.5mn tons. Moving forward, we expect the same to continue as COVID cases in India continue to increase while increasing risk of second wave has reduced the pace of recovery in US and Europe. Low coal prices are a breath of fresh air for local cement manufacturers after depressed margins in 4QFY20 and are going to provide much needed support. As per our estimates, PIOC is the most sensitive to change in coal prices while MLCF stands on the other end of the spectrum.

**Local prices likely to follow international trend:** The urea price in Aug’20 continued their up-trend, rising 13% MoM and 22% CYTD to US$243.5/MT, with a reversal in global demand and energy prices from their early CY20 lows. In local context, the international urea price translates into PKR2,020/bag, at a 73% premium to current local prices, leaving a wide margin for the Fertilizer players to increase urea price in case of no relaxation given on GIDC payment timeline and schedule. To recall, Supreme Court directed complete recovery of GIDC dues from the industrials within next 24 months, w.e.f Aug’20. However, the Fertilizer players have demanded an extension of 8 more years to repay the GIDC dues, indicating a potential urea price increase in case of dismissal of request. In similar vein, DAP price are also on the route of a comeback, rising 5% MoM and 11% CYTD to US$323/MT, translating into local DAP price of PKR3,700/bag. With the onset of Rabi season, the local DAP is expected to cumulative increase of PKR200-250/bag in prices to be in the range of PKR3,700-3,800/bag, as per our channel checks.

**Cotton keeps the momentum going:** Cotton maintained its upward momentum during Aug’20, with international cotton prices nominally increasing by 0.5%MoM to USc70.37 per lbs. The latest USDA report featured small declines to global estimates for MY21 production (-326k bales to 117.2 million) and mill-use (-366k bales to 112.7 million), however, a larger revision to global production for MY20 (-1mn bales) led to lower ending stocks (-1.1mn bales to 103.8mn bales), providing critical support to international prices. Domestic prices observed a steep increase of 4.8%MoM on the fears of damage to crop following torrential rains during the monsoon.

**Steel prices up on rising input costs and demand recovery:** Long steel prices continue their surge for the consecutive 4th month, supported by rising feedstock prices and recovery in demand. Average rebar/billets price rose 1.3%/2.1%MoM during the Aug’20, with the rebar-billet spread narrowing to a multi-year low of US$29 per ton. Scrap prices witnessed 10%MoM as Turkey resumed buying in the outgoing month. The story was more or less similar for flat steel products, where improved demand from the automotive sector and rising feedstock costs pushed the final product prices higher. Average CRC/HRC prices moved up 4.78%/2.99%MoM during the month.

**Food price index climbs to 6-month high:** FAO food price index averaged 96.1pts in Aug’20, +2.0%MoM to reach the highest point in six months helped by weaker dollar and price increases in sugar and vegetable oil segments. Vegetable oil price index surged 6.0%MoM to average at 98.7pts (highest level since Jan’20) mainly reflecting firmer palm oil prices as a result of prospective production slowdowns and higher import demand – negative for UNITY and milk manufacturers (FCEPL, FFL). On the other hand, dairy subindex remains unchanged MoM at 102.0pts in...
Aug’20 under influence from offsetting impact of price decline in whole milk powder (WMP) and cheese and increase in value of skimmed milk powder (SMP) underpinned by steady global import demand for medium-term deliveries and reduced milk production in Europe. Moreover, meat price index remains flat MoM at 93.2pts in Aug’20 where prices of bovine, poultry, and ovine meat diminished amid lower import demand, only to be offset by increase in prices of other components.
Disclosure Section

Neither the information nor any opinion expressed herein constitutes an offer or a solicitation of an offer to transact in any securities or other financial instrument and is for the personal information of the recipient containing general information only. AKD Securities Limited (hereinafter referred to as AKDS) is not soliciting any action based upon it. This report is not intended to provide personal investment advice nor does it provide individually tailored investment advice. This report does not take into account the specific investment objectives, financial situation/financial circumstances and the particular needs of any specific person. Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this report and should understand that statements regarding future prospects may not be realized. AKDS recommends that investors independently evaluate particular investments and strategies and it encourages investors to seek the advice of a financial advisor.

The appropriateness of a particular investment or strategy will depend on an investor's individual circumstances and objectives. The securities or strategies discussed in this report may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them.

Reports prepared by AKDS research personnel are based on public information. AKDS makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. Facts and views presented in this report have not been reviewed by and may not reflect information known to professionals in other business areas of AKDS including investment banking personnel. AKDS has established information barriers between certain business groups maintaining complete independence of this research report.

This report has been prepared independently of any issuer of securities mentioned herein and not in connection with any proposed offering of securities or as agent of any issuer of any securities. Neither AKDS, nor any of its affiliates or their research analysts have any authority whatsoever to make any representation or warranty on behalf of the issuer(s). AKDS Research Policy prohibits research personnel from disclosing a recommendation, investment rating, or investment thesis for review by an issuer prior to the publication of a research report containing such rating, recommendation or investment thesis.

We have taken all reasonable care to ensure that the information contained herein is accurate, up to date, and complies with all prevailing Pakistani legislations. However, no liability can be accepted for any errors or omissions, or for any loss resulting from the use of the information provided as any data and research material provided ahead of an investment decision are for information purposes only. We shall not be liable for any errors in the provision of this information, or for any actions taken in reliance thereon. We reserve the right to amend, alter, or withdraw any of the information contained in these pages at any time and without notice. No liability is accepted for such changes.

Stock Ratings

Investors should carefully read the definitions of all ratings used in each research report. In addition, research reports contain information carrying the analyst’s view and investors should carefully read the entire research report and not infer its contents from the rating ascribed by the analyst. In any case, ratings or research should not be used or relied upon as investment advice. An investor’s decision to buy, sell or hold a stock should depend on individual circumstances and other considerations. AKDS uses a three tier rating system: i) Buy, ii) Neutral and iii) Sell with total returns (capital upside + dividend yield) benchmarked against the expected one year forward floating (variable) risk free rate (10yr PIB) plus risk premium.

Valuation Methodology

To arrive at our period end target prices, AKDS uses different valuation techniques including:

- Discounted Cash Flow (DCF, DDM)
- Relative Valuation (P/E, P/B, P/S etc.)
- Equity & Asset return based methodologies (EVA, Residual Income etc.)

Analyst Certification of Independence

The analysts hereby certify that their views about the companies and their securities discussed in this report are accurately expressed and that they have not received and will not receive direct or indirect compensation in exchange for expressing specific recommendations or views in this report.

The research analysts, strategists or research associates principally having received compensation responsible for the preparation of this AKDS research report based upon various factors including quality of research, investor client feedback, stock picking, competitive factors and firm revenues.

Disclosure of Interest Area

AKDS and the authoring analyst do not have any interest in any companies recommended in this research report irrespective of the fact that AKD Securities Limited may have, within the last three years, served as manager or co-manager of a public offering of securities for, or currently may make a primary market in issues of, any or all of the entities mentioned in this report or may be providing, or have provided within the previous 12 months, significant advice or investment services in relation to the investment concerned or a related investment.
